Product: Private Wire 3.3

Subject: Using UDP Key Exchange with PrivateWire's Client Version 3.3

Description:

Please note that starting from PrivateWire version 3.3, the "Pass connection through client" option is disabled as a default.

You can change this option as follows:

1. After installing PrivateWire Client, please enter PW's client -> Setup -> network configuration and check the box "Pass connection through client".
2. Place a registry file that enables the "Pass connection through client" as part of the installation. The registry entry should be:
 - a. [HKEY_USERS\DEFAULT\Software\ARL\ARCryptoIP Client]
 - b. And the value is: "PassConns"=dword:00000001
 - For additional information on how to customize PrivateWire's installation, please refer to chapter 20 "Customizing PrivateWire Client Setup" in the manual.
