Product: PrivateServer Client 3.x

Subject: Permission masking changes when updating a user with PrivateServer Admin (AKA GMNG utility).

Scenario:

When you update a user's permissions using the GMNG utility, the four left bits in the "Mask HEX value" field Change into 0000.

Example:

Before:

Mask HEX Value:
0xFFFFFFFF

After:

Mask HEX Value:
0x00005FFF

Workaround:

1. Manually change the 4 left bits in the "Mask HEX Value" field.
2. Update users' permissions using MNG – a command line utility.

For more information about permission masking please contact support@arx.com
